

The horizontal lockup

Your original H, cropped straight from the source file — never redrawn — set beside the wordmark so the mark reads across, not down. Two approved treatments below.

1A · PRIMARY LOCKUP

On light. Everyday use — headers, documents, signatures.

On ink. Footers, covers, dark sections.

1E · PLATE VARIANT

On light. Stationery, cards, stamps — the ruled plate reads as understated luxury.

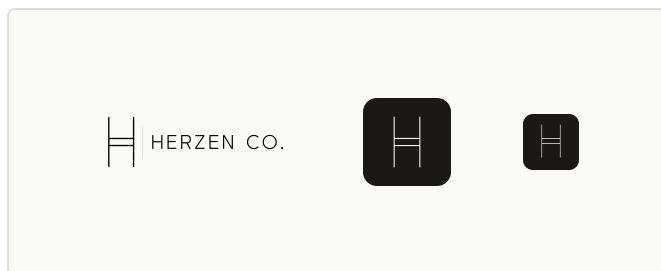

On ink. Same plate, reversed.

CLEAR SPACE & MINIMUM SIZE

Clear space. Keep at least the mark's crossbar-height of air on every side. Nothing sits inside the dashed clay boundary.

Small sizes. Full lockup down to ~24px tall; below that, use the H mark alone (app icon / favicon).

FILES

Lockups: assets/logo-1a-black.png · logo-1a-white.png · logo-1e-black.png · logo-1e-white.png · **Isolated:** assets/mark-h-black.png · mark-h-white.png · wordmark-black.png · wordmark-white.png. All transparent PNG, cropped/composited from your original file.
